Projects

Cardiovascular Disease Prediction Model | *Python, pandas, Scikit-learn, Matplotlib, Seaborn* **Oct 2025 - Dec 2025**

- Built a machine learning system to **predict cardiovascular disease (CVD) risk** using structured clinical CSV data.
- Performed **data cleaning, preprocessing, feature scaling, and EDA**; handled class imbalance using **SMOTE**.
- Trained and compared **Logistic Regression, Random Forest, and XGBoost** for **3-class risk classification (Low / Medium / High)**.
- Achieved **best accuracy of ~66% using XGBoost** for classifying data into 3 categories low, mid and High Risk.
- Implemented **XGBRegressor** to predict continuous risk scores with **$R^2 \approx 0.91$** .
- GitHub Repository Link: [GitHub-link](#)

Instagram Account Authenticator | *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn* **Feb 2025 - Apr 2025**

- Engineered a machine learning-based system to **identify fake Instagram accounts** using behavioral and profile-based features.
- Implemented supervised learning algorithms to classify genuine vs fake accounts, achieving - **90%** prediction accuracy evaluated using accuracy, precision, recall, and F1-score.
- Designed visual analytics to interpret model predictions and user behavior patterns for better decision-making.
- GitHub Repository Link: [GitHub-link](#)

Coal Consumption Dashboard | *Microsoft Excel, Pivot Tables, Power Query, Data Analysis* **Feb 2025 - Apr 2025**

- Developed an **interactive Excel-based dashboard** to analyze state-wise and sector-wise coal consumption across multiple years.
- Performed **data cleaning, preprocessing, and transformation** using Pivot Tables, filters, and formulas to ensure accurate analysis.
- Visualized trends using **bar charts, line graphs, stacked columns, and geographical heat maps** to identify high-consumption regions and enabled dynamic insights through slicers for year, state, and sector-based analysis to support data-driven decision-making.
- GitHub Repository Link: [GitHub-link](#)

Training

CodeQuery: The Ultimate PL/SQL & Data Science Bootcamp **Jun 2025 - Jul 2025**

- Hands on training in PL/SQL, Oracle APEX, Python analytics, EDA, ML basics, and database-driven application development. Completed capstone project "**Lab Inventory Tracker**."
- Worked on **real-time database operations**, including procedures, triggers, and transaction handling for inventory management.
- Built interactive dashboards and reports using **Oracle APEX and Python visualizations**.
- GitHub Repository Link: [Live-link](#) (credentials: username-dhgoyal001@gmail.com, Password-12306503)

Certificates

- | | |
|---|-----------------|
| NPTEL Introduction to Machine Learning. NPTEL | Oct 2025 |
| CodeQuery: The Ultimate PL/SQL & Data Science Bootcamp. LPU CPE | Jul 2025 |
| Java Programming. NeoColab | May 2025 |
| Data Structures and Algorithms. NeoColab | Dec 2024 |
| C- Programming Language. CipherSchools | May 2024 |

Technical Skills

Languages: Java, C++, C, Python, SQL

Technologies/Frameworks: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Git, GitHub, Power BI, Excel, Oracle

Skills: Data Analysis, EDA, Machine Learning Models

Education

Lovely Professional University

Computer Science and Engineering — CGPA: 8.67

2023 – 2027

Jalandhar, Punjab

Dr. RPSD Senior Secondary School

12th with Science — Percentage: 92.4

2020 – 2022

Barnala, Punjab

Sarvhitkari Senior Secondary School Vidya Mandir

10th with Science — Grade: A+

2019 – 2020

Barnala, Punjab
